HOLLYHURST GARDENS
J. Stuart Cooley, Prop., RR. Box 70, Berwyn, Maryland
Catalog No. 5, January 1947

DAYLILIES

The newer developments in daylily varieties give a very wide range of color and time of blooming. They lend themselves to many uses in home-ground plantings, adding color and charm to the perennial border at a time when flowers may be scarce. They also form an effective front for a green bank of shrubbery. Wherever used daylilies will give life and distinctiveness to your plantings.

Varieties and Season of Blooming

The varieties here listed have been chosen for their outstanding qualities. The time of blooming varies somewhat from year to year but one can roughly classify the varieties into four groups: viz, early, early mid-season, mid-season, and late. In the vicinity of Washington, D.C., varieties marked "e" (early) bloom within the period of May 2-31; those marked "em" (early mid-season) June 1-30; those indicated by "m" (mid-season) July 1-20; and those marked "l" (late) July 20 until frost.

Instructions for Ordering and Planting

We take pride in supplying strong plants of superior varieties at a reasonable price. We do not sell un-named seedlings. Our stock is guaranteed true to name. If a mistake should occur adjustment will be promptly made. Postage will be paid on all orders of \$2.00 or more. Transplanting may be done in spring or in mid-summer after blooming is over. Late fall planting is not advised where the weather is cold enough for winter injury to be a problem. Daylilies grow best when planted in a fertile soil.

New Varieties

The introductions of Dr. H. P. Traub, a noted breeder of daylilies, are increasing in popularity every year. Such varieties as Mayor Starzynski and Lidice are fine for their garden effect, while Mildred Orpet, Geo. Kelso, Carnival, and Duchess of Windsor add color harmony in the garden with their lighter shades. His Dr. Stout variety combines shapeliness of flower form and a pleasing orange color with a reddish tint. It should be in every collection. We are glad to report that the stock of Berwyn, a very high quality red, is sufficient to enable a reduction in price to \$5. The stock of the very superior new yellow, Adventure, is sufficient to warrant reducing the price to \$3. This variety has given excellent performance on our grounds; it blooms over a long season, has good branching and fine finish and form.

Traub Introductions

EACH

BERWYN (Traub and Cooley 1945), m, 3,4*, bright carmine; yellow throat.	\$ 5.00
CARNIVAL, m, 3,5, 5, Moro red; large orange throat	3.00
DR. STOUT, m, 3,5, 5, brilliant sunburst; ground color deep orange overlaid with sprightly red	3.00
DUCHESS OF WINDSOR (Traub-Hayward), m, 2,5, 4, full flowers; delicate light orange with polychrome sheen	3.00
FRED HOWARD, m, 3, 4,5, petals near Ember; sepals lighter chrome; lemon throat	3.00
GENERAL MacARTHUR, m, 3, 4,5, bright iridescent Vermilion red	15.00
GEORGE KELSO, m, 4,5, 4,5, light bronzy-rose; bicolor; fine garden effect . .	3.00

* The first figure indicates height in feet, the second spread of flower in inches
